

MATTHEW J HICKS

DIGITAL IMAGING TECHNICIAN

CURRICULUM VITAE

ABOUT ME:

I am a Digital Imaging Technician (DIT) with almost 5 years experience in the industry, having worked on every form of production, including feature films, TVCs, virals, music promos, live events, corporates and episodic television. I am familiar with the majority of modern digital camera formats including Arri Alexa (XT and Classic), RED EPIC and SCARLET, Sony F65/F55/F5, Phantom, Canon C500/C300, Panasonic Varicam and DSLR as well as Codex Digital systems.

Specialising in tapeless workflows and confident in creating 'one-light' grades with any level of input from the DoP,

I am able to maximise use of the latest dailies generation programs such as Assimilate Scratch, DaVinci Resolve and Redcine-X Pro.

Equally as proficient with checksum verification software such as ShotPut Pro, more recently you will also find me 'live-grading' on-set.

Data wrangling, quality control and transcoding on-set are my bread and butter activities. Much of my off-set time is spent researching current and future camera technologies (because that *really is* my idea of fun) which has proved

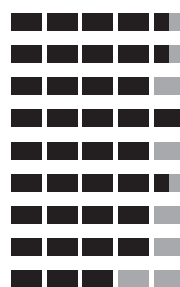

useful on-set as well as in workflow consultation countless times.

Impeccable diligence and attention to detail are my trademarks. With a strong background in I.T. support comes a technical knowledge of computer systems and architecture that serves as an excellent foundation for digital camera systems and post production workflows.

I believe resolutely in the power of digital acquisition and tools to drive cinematography to new levels and am passionately dedicated to pushing technology towards satisfying that goal, one byte at a time.

PROGRAMS

Assimilate Scratch
Redcine-X Pro
DaVinci Resolve
Shotput Pro
Pomfort LiveGrade
Pomfort Silverstack
Final Cut Studio
Adobe Creative Suite
Avid Media Composer

KIT

- MacBook Pro Retina
- 17 inch 'Grade 1' SDI Monitor
- RAID 5 backup
- 400w UPS, card readers, accessories
- Mac Pro and LiveGrade systems on request
